## EDUCATION

---

**University of Puerto Rico at Mayagüez**

**Mayagüez, PR**

*Bachelor of Science in Computer Science*

*Expected Graduation: December 2019; GPA 3.21/4.00*

## EXPERIENCE

---

**Puerto Rico Water Resources and Environmental Research Institute**

**Mayagüez, PR**

*Webmaster*

*October 2018 – Present*

- Transitioning website and server architecture to a modern and faster Wordpress-based platform with improved readability and conformance with current web standards

**Department of Finance of University of Puerto Rico at Mayagüez**

**Mayagüez, PR**

*Work Study Student*

*June 2018 – June 2018*

- Assisted department personnel routinely publishing and updating internal and public documents using Wordpress, as well as the department director in documenting active internship insurance policies during the 2018 summer break using FileMaker Pro
- Documented over 250 departmental furnishings and supplies in a digital database, completing it on-time for the first time of fiscal year close

**Puerto Rico Seismic Network**

**Mayagüez, PR**

*Student Worker (Web Developer)*

*August 2017 - April 2018*

- Built on the research page web map by implementing a faster, more accessible, and fully responsive web map for the geodesy research page using Leaflet.js
- Worked with the Seismic Network's IT personnel with various tasks such as updating information, diagnosing computer problems, and setting up audio/visual equipment

## PROJECTS

---

**UAV Search and Rescue Project**

*September 2018*

- Prototyping face identification, along with detection of pedestrians using Android and OpenCV for search and rescue purposes on the island of Puerto Rico

**TITANPOINTE**

*September 2016*

- Built on Jekyll/Ruby on Rails running on CentOS servers with the purpose of running a personal website that would also serve as a creative bed for development creating dynamically generated archive pages using date URL as well as a dedicated webpage that served over 1000 views from more than 600 unique users without slowdowns or outages

## SKILLS

---

- Intermediate knowledge of C++, Jekyll
- Beginner knowledge with Xcode, Ruby, PHP, Swift, Javascript
