EXPERIENCE

Work-Study Program, UPRM Department of Finances; Mayaguez, PR — June 2018

- Maintained and published the department's WordPress website.

- Assisted department director in writing insurance policy letters for students interning during the 2018 summer break.

- Documented yearly departmental furnishings, desks, chairs, and computers in a digital database – done for the first time on-time of FY close.

Student, Red Sismica de Puerto Rico; Mayaguez, PR — August 2017 – April 2018

- Managed the Research and Geodesy pages of the Puerto Rico Seismic Network.

- Implemented a new map for the Geodesy page using Leaflet.js.

- Helped with IT roles in the Puerto Rico Seismic Network.

EDUCATION

University of Puerto Rico, Mayaguez, PR — Bachelor of Science in Computer Science, Fall 2019

SKILLS

- Experience with HTML/CSS/JavaScript, C++ in a Unix environment, Xcode, GitHub, Git, and the Jekyll static site generator.

- Proficient with macOS. Familiar with Ubuntu server distros. Native English and Spanish proficiency.

- Familiar with PHP, web server management, and DigitalOcean droplet management.

- Elementary knowledge of the Swift programming language.

PROJECTS

titanpointe.org – September 2016

- Personal website. Used Jekyll to create my website and git to version and safely deploy my website to a VM on DigitalOcean.

- Created a dedicated page with instructions on how to fix SSH connection issues for macOS users trying to access the UPRM class enrollment system. Received over 1000 visits per day from +600 unique users during enrollment week of Spring 2017. Similar

- Learned HTML and CSS. Adapted Ruby and JavaScript code to use with this project.
